+55 11 962531469 - São Paulo, Brazil

Senior Software Engineer with 5+ years of experience using technology to create excellent products, tech solutions and solve problems

## WORK EXPERIENCE

### Senior Software Engineer - Routable

Mar/2022 - Jan/2023 (Seattle - USA - Remote work)

- Implemented brand new sign-up flow and helped onboard clients faster thus unblocking sales and increasing the number of clients Routable has.
- Created integrations with third-party services APIs such as Alloy and Xero app marketplace to improve the platform's reliability.

### Software Engineer - ConsumerAffairs

Mar/2021 - Mar/2022 (Tulsa - USA - Remote work)

- Created integrations with third-party services APIs such as Twilio, Outreach, and Iterable to improve the platform client's acquisition.
- Implemented async tasks using Celery and Dramatiq in a Micro Service environment.
- Encharged with welcoming and onboarding new team members and leading them to deliver complex features involving roles like QA, Product, and DevOps.
- Improved and implemented new features on a critical system of the company used for billing clients.

### Software Developer - Joyjet Digital Space Agency

Jan/2019 - Mar/2021 (France - Remote work)

- I worked on different projects of REST APIs from conception to delivery passed through planning, modeling, development, testing, documentation, and deployment.
- Created integrations with third-party services such as Twilio and Stripe.

### Software Developer - CPTM

Jan/2018 – Dec/2018 – Software Developer

- Planning and development of web systems using mainly Python, Django, HTML, CSS, JS, Git, and Heroku.
